ASSIGNED 57328

APPLICATION FOR PERMISSION TO CHANGE POINT OF DIVERSION, MANNER
OF USE AND PLACE OF USE OF THE PUBLIC WATERS OF THE
STATE OF NEVADA HERETOFORE APPROPRIATED

	e of filing in State Engineer's Office MAR 2.3 1992
Ren	urned to applicant for correction APR 2.4.1992
Cor	rected application filed JUN 2 2 1992 Map filed FEB 2 7 1992 under 57248
	The applicant Sierra Creek Ranch, Inc., c/o Vasey Engineering Co., Inc.
	P 0 Box 247 of Minden Street and No. or P.O. Box No. City or Town
*******	Nevada 89423 hereby make application for permission to change the
	Manner of Use of a Portion  Point of diversion, manner of use, and/or place of use
of w	vater heretofore appropriated under A District Court Decree dated August 29, 1879.  Identify existing right by Permit, Certificate, Proof or Claim Nos. If Decreed, give title of Decree and
	affirmed by the Nevada Supreme Court in a decision dated April 1, 1885, Case No.
*******	1081 as they pertain to 7/10 of the flow in Sierra Canyon Creek.
	•
	The source of water is Sierra Canyon Creek (Infiltration Well)  40 percent of the Physical Sierra  Canyon Creek (see remarks)
	The amount of water to be changed Canyon Creek (see remarks)  Second feet, acre feet. One second foot equals 448.83 gallous per minute.
3.	The water to be used for
4.	The water heretofore permitted for Irrigation, stock and domestic purposes (see remarks)  Irrigation, power, mining, industrial, etc. If for stock state number and kind of animals.
5.	The water is to be diverted at the following point within the NE's SW's of Section 3, T.13N., R.19E.  Describe as being within a 40-acre subdivision of public survey and by course and
	M.D.B.&M., Douglas County, Nevada, or at a point from which the Southwest corner distance to a section corner. If on unsurveyed land, it should be stated.
	of said Section 3 bears S 50°40'W, 2934 feet-Infiltration Well No.(see remarks).
6.	The existing permitted point of diversion is located within the NE's SW's of Section 3, T.13N., R.19E.
	M.D.B.&M. The aforementioned Decree does not indicate a specific point of diversion
	Sierra Canyon Creek is within 300 feet of the proposed point of diversion.
<b>7.</b> :	Proposed place of use No Change.  Describe by legal subdivisions. If for irrigation state number of acres to be irrigated.
	~
8. 1	Existing place of use. <u>portions of the SE SE, NE SE, NW SE, SW SE, SE NE, SW NE, NE</u> Describe by legal subdivisions. If permit is for irrigation, state number of acres irrigated. If changing place of use and/or
7	SW. NW NE. SE SW and the SW SW of Section 3: Portions of the SE NE. NE NE. NW manner of use of irrigation permit, describe acreage to be removed from irrigation.  NE, SW NE, NE NW and the NW NW of
	Section 10 all in T.13N., T.19E., M.D.B.&M., Douglas County, Nevada (see remarks).
9. (	Use will be from January 1 to <u>December 31</u> of each year.  Month and Day Month and Day
10. 1	Use was permitted from January 1 to December 31 of each year,
11. 1	Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and
	specifications of your diversion or storage works.) a drilled infiltration well. 500,000 gallon storage tank, and water lines of various  sized necessary to provice potable water and fire protection for the development.  Estimated cost of works -\$1,732,000.
l2. I	Estimated cost of works -\$1,732,000.
13. I	Estimated time required to construct works 5 years

Please use the map submitted to support Applications 57248 and 57249 to support this Application.

- Item 2. No rate of diversion is given in the aforementioned Decree other than "seven tenths of the water of Sierra The rate of diversion is based on the water requirements of the Genoa Lakes Project, which will have a water system serving 220 dwelling units, a golf course club house, and landscaping. The water system will 500,000 gallon storage tank for fire The rate of diversion is estimated to be include a protection. 500gpm during the time the pump in the infiltration well is pumping. The U.S. Geological Survey Water-Resources Investigations Report 86-4328 in Table 2 indicates that the estimated runoff in Sierra Creek is 1000 acre-feet per year. 7/10 of 1000 acre feet is 700 acre feet and this Application together with Application 57327 proposes to change a combined total of 280 acre feet per year or. 40% of the water right in Sierra Canyon Creek owned by Sierra Creek Ranch, Inc.
- Item 4. The manner of use is stated in the aforementioned Decree.
- Item 5. It is the intent of the Applicant to withdraw a portion of the Sierra Canyon Creek water right established in the aforementioned Decree from an infiltration well.
- The aforementioned Decree indicates "that the Plaintiff, Joseph Jones, is entitled to use, as the first appropriator, upon his said land, upon each and every part thereof, seven-tenths of all the water customarily flowing in said Sierra Creek, and is entitled to divert the said water from the said stream upon his said land by means of flumes, ditches, or otherwise, and to use the same upon his said land for the irrigation thereof; and to use so much of the said seven-tenths of said stream as is necessary for his stock and domestic purposes." (Third Finding).

The above-described Jones land is now known as the Sierra Creek Ranch where the Genoa Lakes Project is being developed.

A copy of the Tentative Map for the Genoa Lakes Planned Unit Development, which has been approved by Douglas County, is enclosed.

Item 15. Each of the two (2) Infiltration wells will be equipped with submersible pumps capable of pumping 500 gpm each. The pumps will turn on a portion of each day depending on demands in the system. Water will be stored in a 500,000 gallon storage tank to meet a fire fighting demand. The portion of the existing water right being changed is described in Item 2 above.

57328

(PERMIT TERMS CONTINUED)

Page 2

\*The annual duty of water under this permit is initially limited to 90 acre-feet. A minimum of 280 acre-feet annually to be changed under Permits 57327 and 57328 must be diverted back into the natural channel of Sierra Canyon Creek east of the major fault line at the base of the Sierra Nevada Mountain Range. Measuring devices to be approved by the State Engineer must be installed, maintained and weekly records of flow kept at or near the discharge point to the natural channel and at the point at which the channel crosses beneath Foothill Road. The monitoring wells constructed under Waiver Number W-365 for said permits shall be monitored on a weekly basis. Records of flow and static water levels shall be submitted to the Office of the State Engineer on a monthly basis. The measuring devices and static water level measurement must begin at least 3 months prior to the drilling and pumping of the proposed wells under said permits. The annual duty of water allowed by this permit may be raised to a maximum of 280 acre-feet in stages and as approved and authorized by the State Engineer only after the State Engineer has determined that the additional withdrawal will not adversely affect existing rights or the ground water resource.
